

## Step by Step Guide For installing the ORACLE 10g With Scott Schema

1. Download the ORACLE 10g 64bit for windows from [here](#).
2. Give password “**admin**” during installation.
3. Open CMD window.

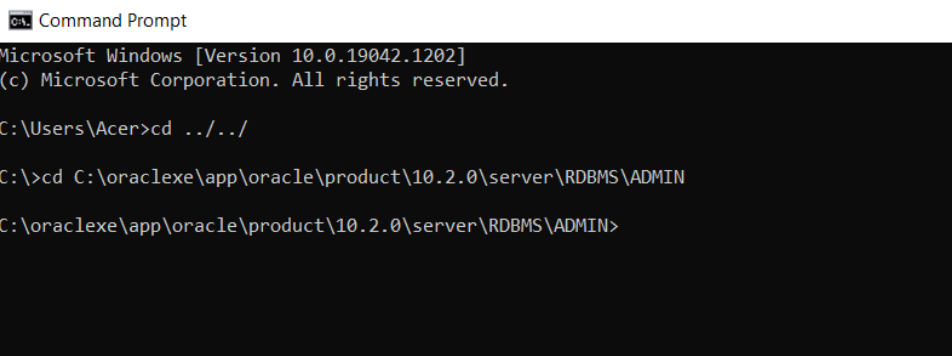

Command Prompt

```
Microsoft Windows [Version 10.0.19042.1202]
(c) Microsoft Corporation. All rights reserved.
```

```
C:\Users\Acer>
```

4. Type below commands and press Enter,
  - i) `cd ../../`
  - ii) `cd C:\oraclexe\app\oracle\product\10.2.0\server\RDBMS\ADMIN`

Command Prompt

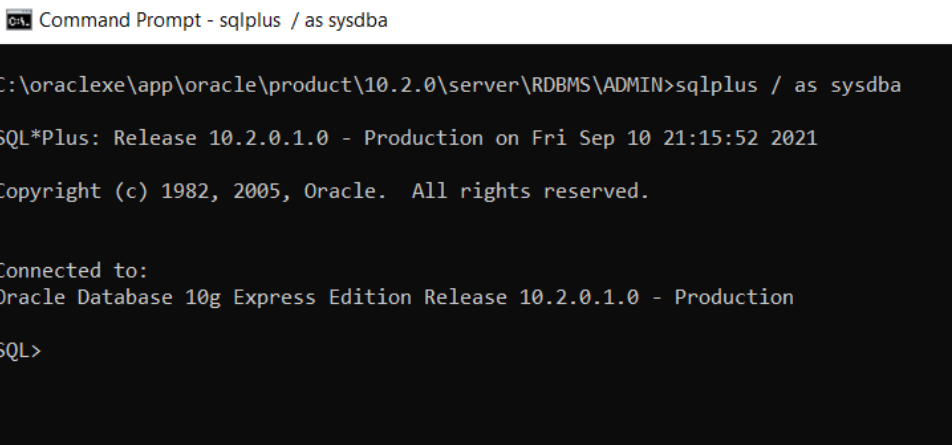

```
Microsoft Windows [Version 10.0.19042.1202]
(c) Microsoft Corporation. All rights reserved.
```

```
C:\Users\Acer>cd ../../
```

```
C:\>cd C:\oraclexe\app\oracle\product\10.2.0\server\RDBMS\ADMIN
```

```
C:\oraclexe\app\oracle\product\10.2.0\server\RDBMS\ADMIN>
```

5. Run the SQLPlus by using this command “`sqlplus / as sysdba`”

Command Prompt - sqlplus / as sysdba

```
C:\oraclexe\app\oracle\product\10.2.0\server\RDBMS\ADMIN>sqlplus / as sysdba
```

```
SQL*Plus: Release 10.2.0.1.0 - Production on Fri Sep 10 21:15:52 2021
```
